ClassKite

CHEAT SHEET

FOR MATHS TEACHERS

The LaTeX codes you'll actually use.

Fractions, powers, roots and symbols that look right in your ClassKite questions.

$$\frac{3}{4} \quad x^2 \quad \sqrt{16} \quad \pi$$

ClassKite

01 · FRACTIONS

Fractions that look like fractions.

```
\frac{3}{4}
```

BECOMES

$$\frac{3}{4}$$

ClassKite

02 · POWERS

Powers that sit where they should.

```
x^2
```

BECOMES

x^2

```
2^{10}
```

BECOMES

2^{10}

Tip: use braces when the power has more than one character.

Square roots and beyond.

```
\sqrt{16}
```

BECOMES

$$\sqrt{16}$$

```
\sqrt[3]{27}
```

BECOMES

$$\sqrt[3]{27}$$

Greek letters and subscripts.

`\theta` θ `\pi` π

`v_0`

BECOMES

v_0

Type it straight into the question.

```
Evaluate \frac{12}{4} + 2^2
```

STUDENTS SEE

Evaluate $\frac{12}{4} + 2^2$

It renders in the question and the answer. There's no equation editor, so you type the code; diagrams go in as images.
